EXHIBIT INDEX

EXHIBIT 99.1:	Voluntary Lock-up Period Expires On Acquisition Share

ASX/MEDIA RELEASE 30 June 2006

Voluntary Lock-up Period Expires On Acquisition Shares

Boston, MA. and Perth, Australia - Global bio-nanotech company pSivida Limited (ASX:PSD, NASDAQ:PSDV, Xetra:PSI) is pleased to announce that the voluntary lock up period applied to the American Depositary Shares (ADSs) issued by the Company on the acquisition of Control Delivery Systems Inc. (CDS) will terminate on 1 July 2006. This termination does not apply to certain employee-held, non-vested ADSs which may not be sold for additional periods.

The Company filed a registration statement on Form F-3 to register the resale of the ADSs issued in relation to the CDS acquisition with the Securities Exchange Commission (SEC) on 29 June 2006. The Company expects that the registration statement will be declared effective in July 2006. The ADSs issued in the acquisition may only be sold pursuant to an effective registration statement or an exemption from registration.

This release does not constitute an offer of any securities for sale.

NOTES TO EDITORS:

pSivida is a global bio-nanotech company committed to the biomedical sector and the development of drug delivery products. RetisertTM is FDA approved for the treatment of uveitis. Vitrasert® is FDA approved for the treatment of AIDS-related CMV Retinitis. Bausch & Lomb own the trademarks Vitrasert® and RetisertTM. pSivida has licensed the technologies underlying both of these products to Bausch & Lomb. The technology underlying MedidurTM, a treatment for diabetic macular edema, is licensed to Alimera Sciences and is in Phase III clinical trials.

pSivida owns the rights to develop and commercialise a modified form of silicon (porosified or nano-structured silicon) known as $BioSilicon^{TM}$, which has applications in drug delivery, wound healing, orthopaedics, and tissue engineering. pSivida's subsidiary, AION Diagnostics Limited is developing diagnostic products and the subsidiary pSiNutria is developing food technology products both using $BioSilicon^{TM}$.

pSivida's intellectual property portfolio consists of 70 patent families, 74 granted patents and over 290 patent applications. pSivida conducts its operations from offices and facilities near Boston in the United States, Malvern in the United Kingdom, Perth in Australia and Singapore.

pSivida is listed on NASDAQ (**PSDV**), the Australian Stock Exchange (**PSD**) and on the Frankfurt Stock Exchange on the XETRA system (**German Symbol: PSI. Securities Code (WKN) 358705**). pSivida is a founding member of the NASDAQ Health Care Index and the Merrill Lynch Nanotechnology Index.

The Company's largest shareholder and a strategic partner is QinetiQ, a leading international defence, security and technology company, formed in 2001 from the UK Government's Defence Evaluation & Research Agency (DERA). QinetiQ (QQ.) was instrumental in discovering BioSiliconTM and pSivida enjoys a strong relationship with, including access to its cutting edge research and development facilities.

This document contains forward-looking statements that involve risks and uncertainties. The statements reference potential products, applications and regulatory approvals. Although we believe that the expectations reflected in such forward-looking statements are reasonable at this time, we can give no assurance that such expectations will prove to be correct. Given these uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. Actual results could differ materially from those anticipated in these forward-looking statements due to many important factors including: our inability to develop proposed products, including without limitation, in the drug delivery, wound healing, orthopaedics, and tissue engineering, diagnostics and food technology fields; failure of our evaluation agreements to result in license agreements; failure to develop applications for BioSiliconTM due to regulatory, scientific or other issues; failure to complete negotiations for new centres for the BrachySilTM phase IIb clinical trial for inoperable primary liver cancer; failure of our discussions with the FDA for BrachySilTM to continue or to lead to FDA approval; failure of the BrachySilTM phase IIb clinical trial for inoperable primary liver cancer to determine the optimal dose, provide key safety data or support future pivotal efficacy trials or product registration or approval; failure of the BrachySil™ primary liver programme that is in phase IIb clinical trials to provide a valuable platform for the development and commercialisation of BrachySilTM for pancreatic cancer and other indications; failure to commence phase IIa BrachySilTM trials for the treatment of pancreatic cancer; failure of the findings of the pancreatic cancer phase IIa trial to provide a platform for further multi-centre efficacy and safety trials; failure of there to be optimisation and standardisation between our two pancreatic cancer study centres; failure of the results of the RetisertTM for DME trial to be a good indicator of the results of pSivida's ongoing phase III MedidurTM for DME trial; failure of the MedidurTM trials in DME to show a very similar improvement in visual acuity and diabetic retinopathy severity score as RetisertTM for DME; failure of MedidurTM to release fluocinolone acetonide at the same rate as RetisertTM; our inability to recruit patients for the phase III MedidurTM for DME trial;. Other reasons are contained in cautionary statements in the Annual Report on Form 20-F filed with the U.S. Securities and Exchange Commission, including, without limitation, under Item 3.D, "Risk Factors" therein. We do not undertake to update any oral or written forward-looking statements that may be made by or on behalf of pSivida.
